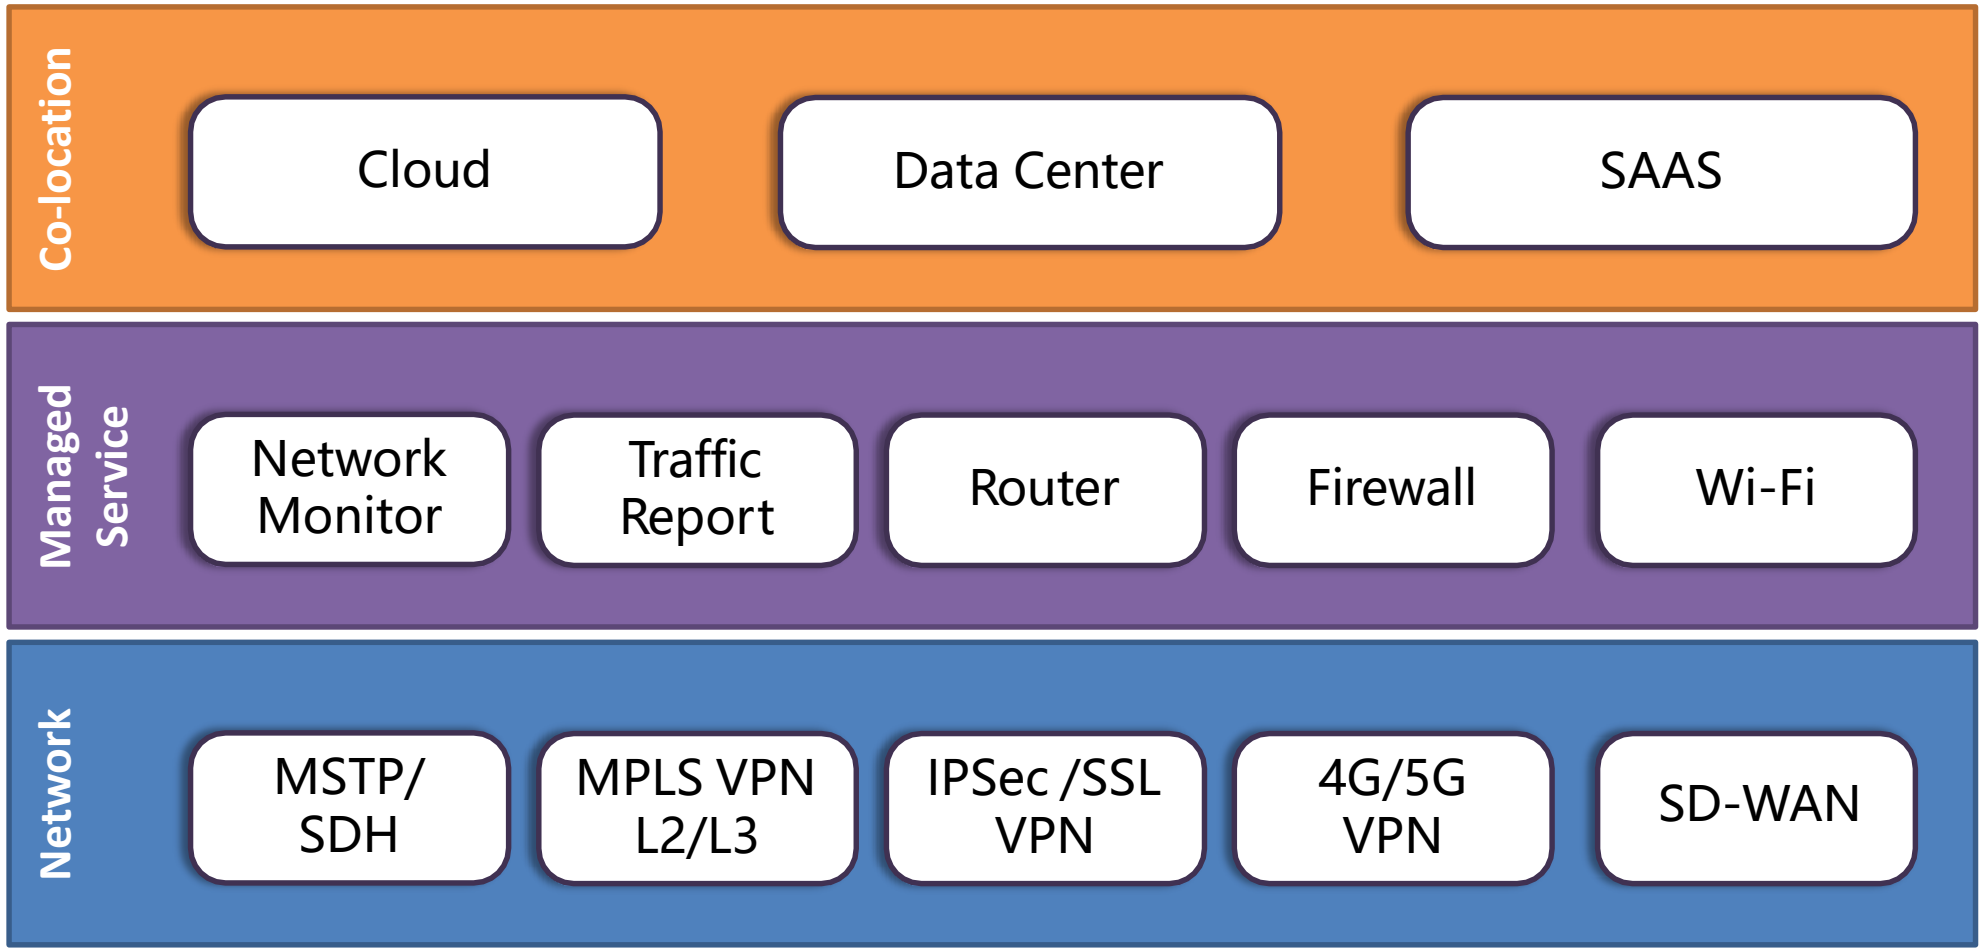
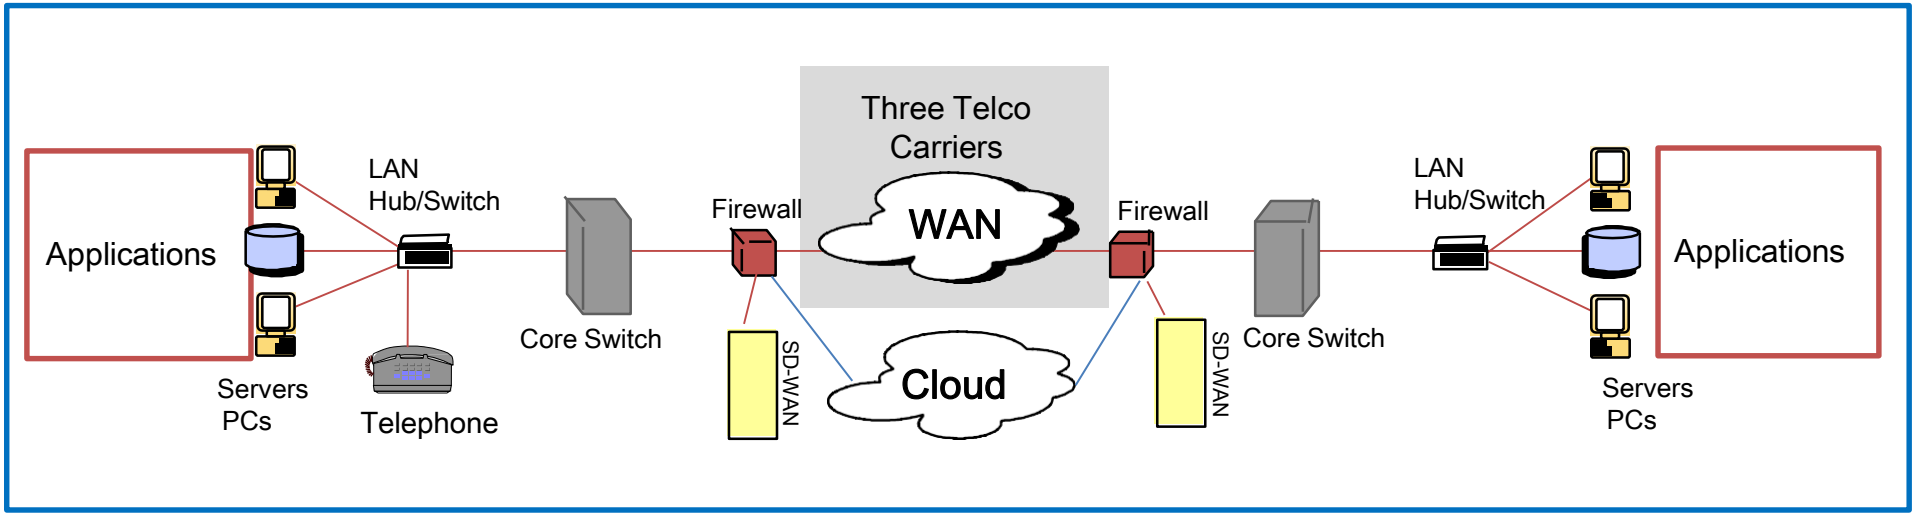
Connect Service



ICT Service

Provide comprehensive solution and service with ICT experience to customer



Evaluation	Design	Project Rollout	Operation maintenance	Life cycle management
• Demand Analysis • Conditions Assessment • Site Survey • Consultant Service	• Infra. Design • System Design • Security Design • Proposal	• Project Management • Equipment Install • System Configuration • UAT	• Network Monitoring • Fault identification • Failure isolation • Troubleshooting • Config management • Device maintenance • Asset management • Spare Part service • Security management • SLA & QoS	• ITIL • All In One • System optimization • Operation and Management reporting

IT Infrastructure Service

→ITI Foundation

- SCS (Structured Cabling System)
- PAS (Public Addressing System)

→IT Room Utility

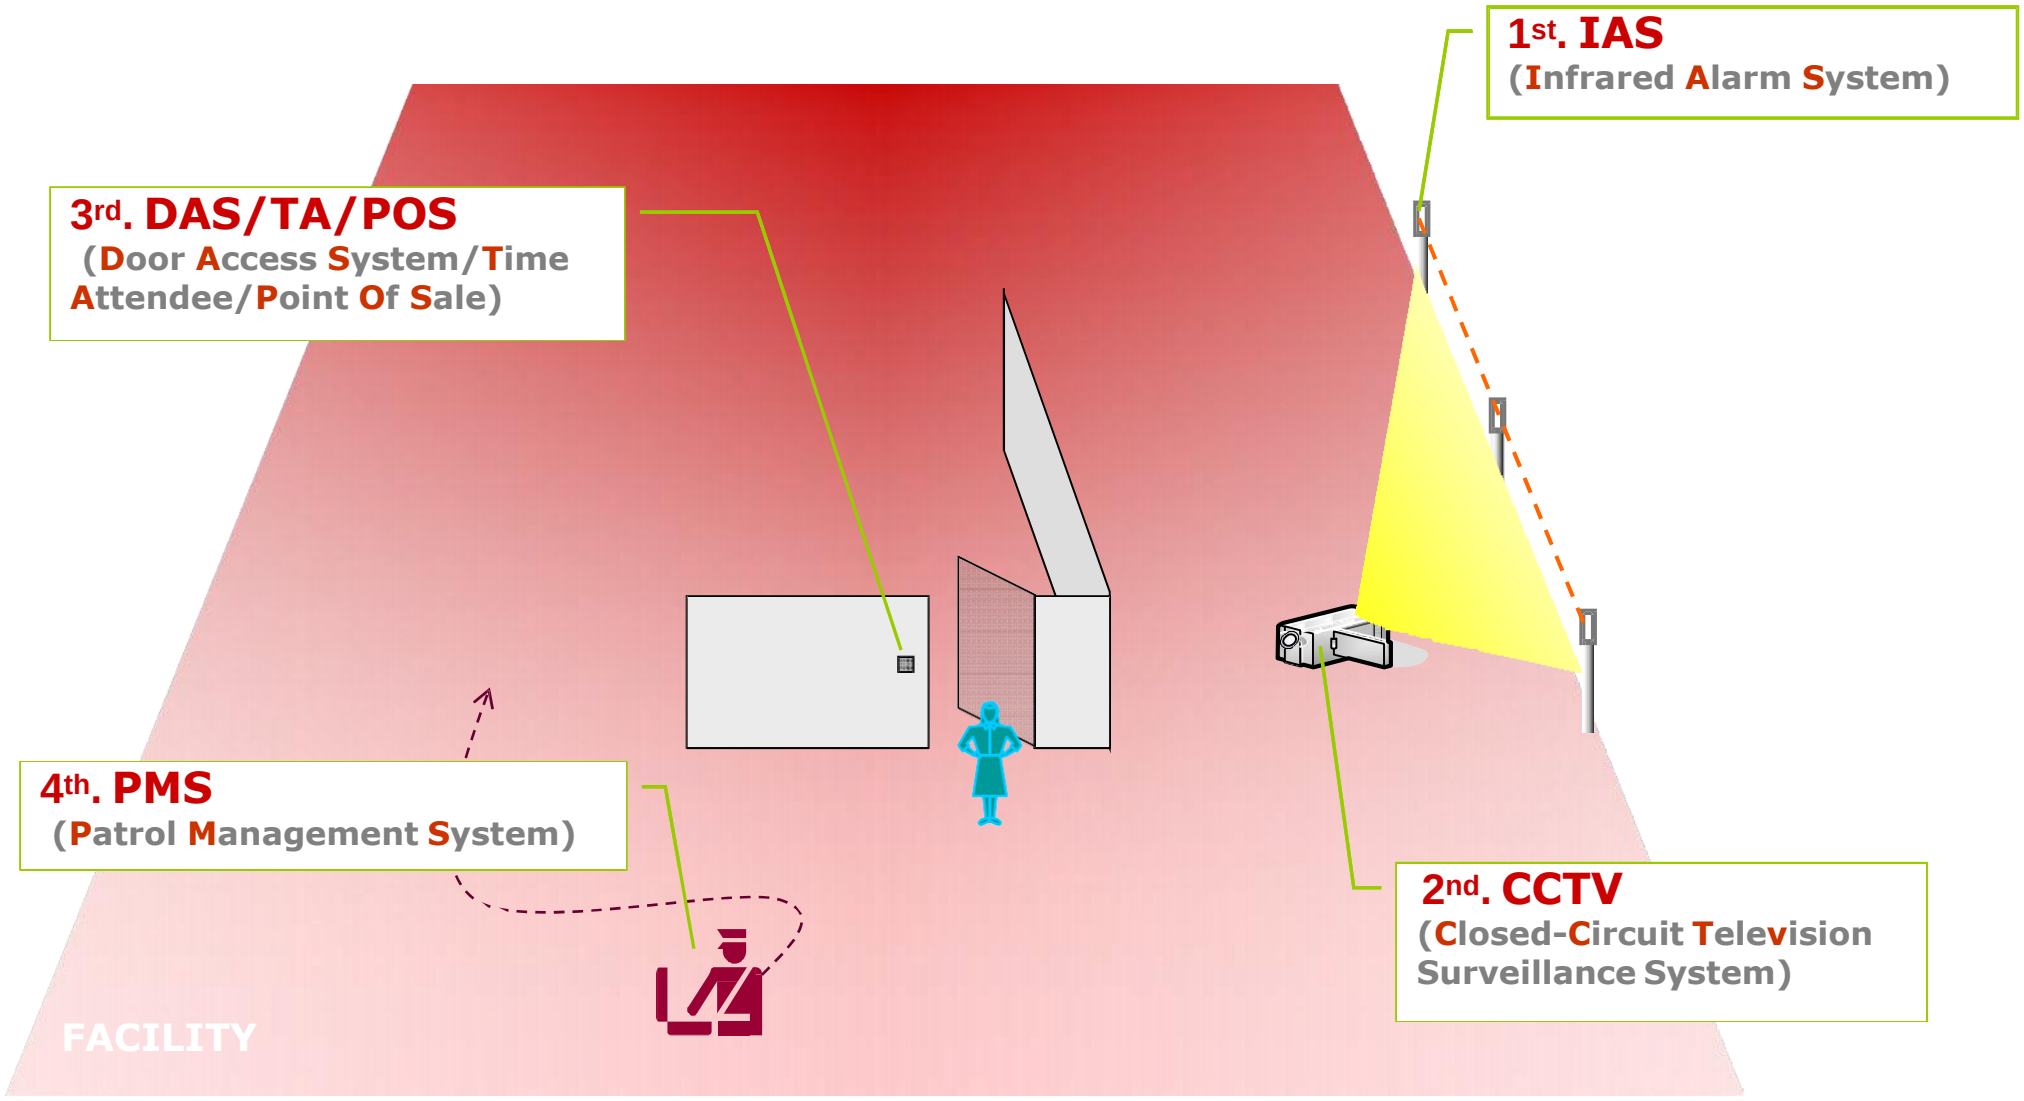
- Antistatic-Floor
- Precision A/C
- Gas Fire Extinguishing System
- UPS

→Project Management Methodology

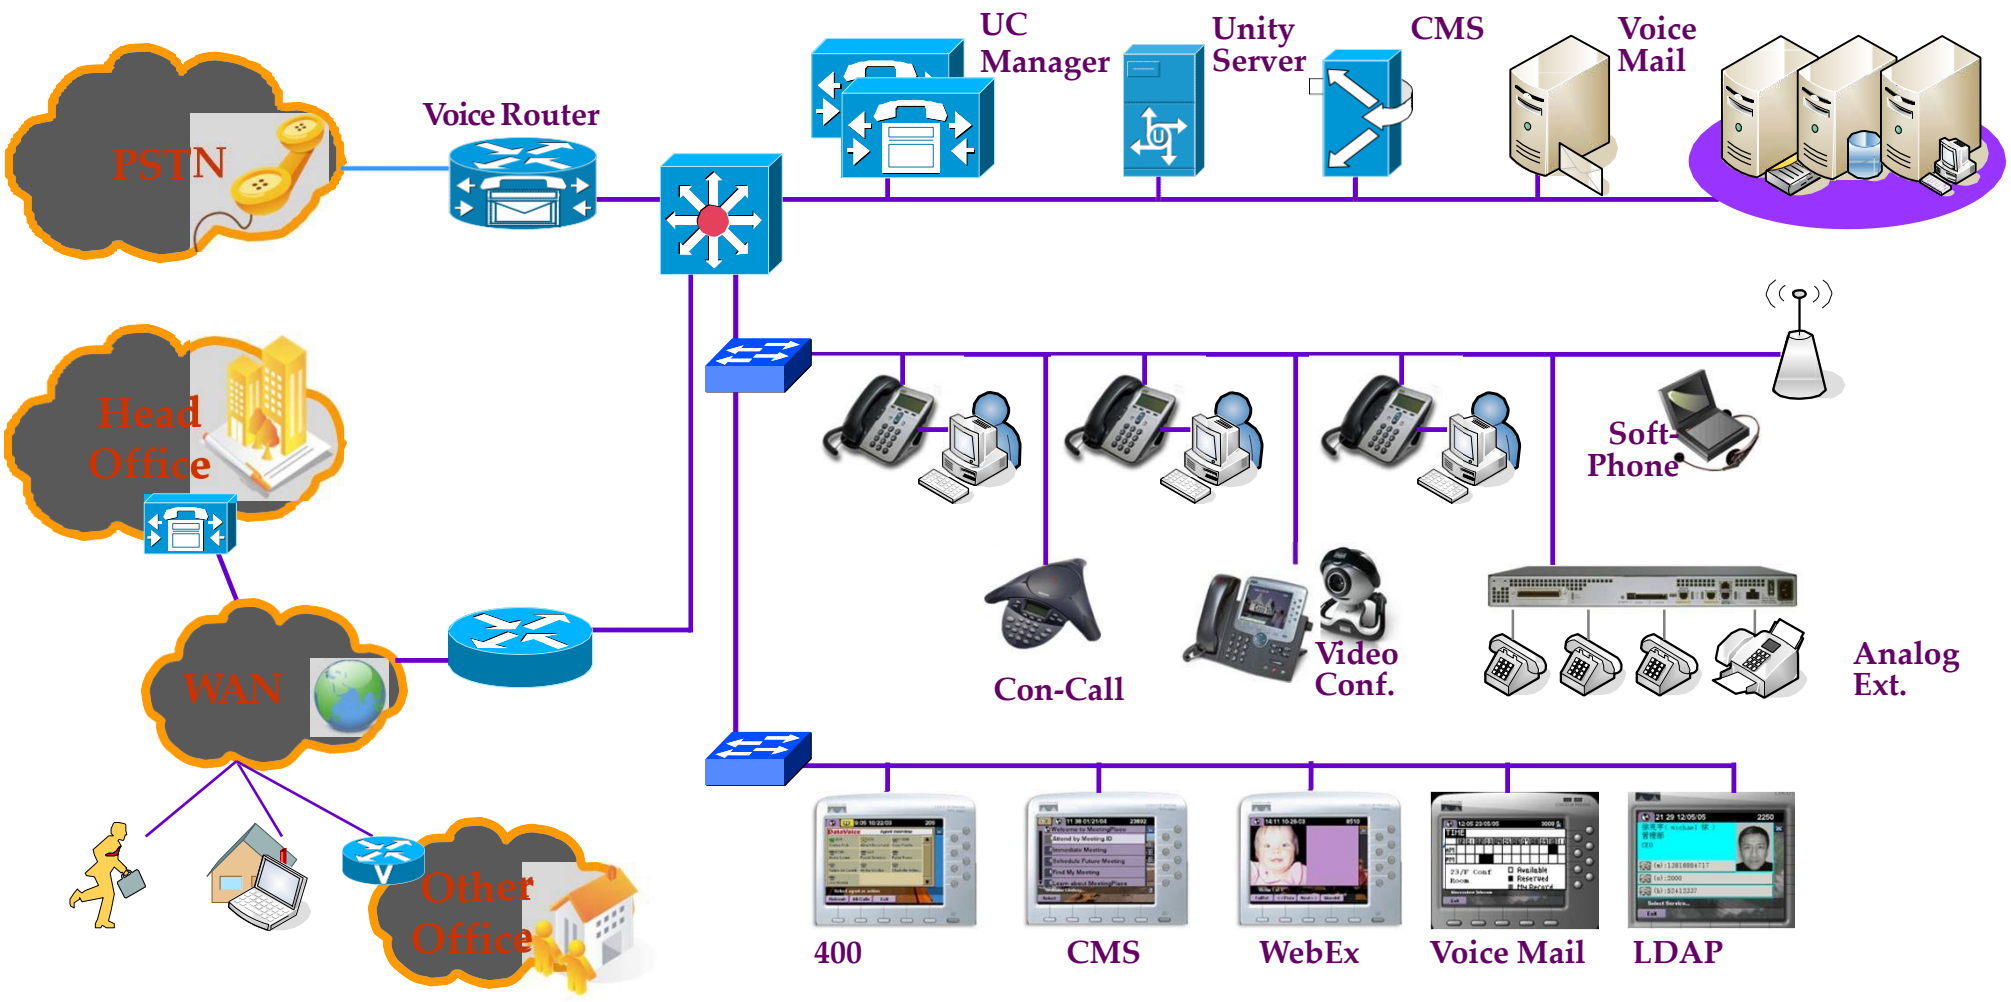
→Experienced Project Manager

→Co-ordination Skills

→IT Leveraged Facility Security

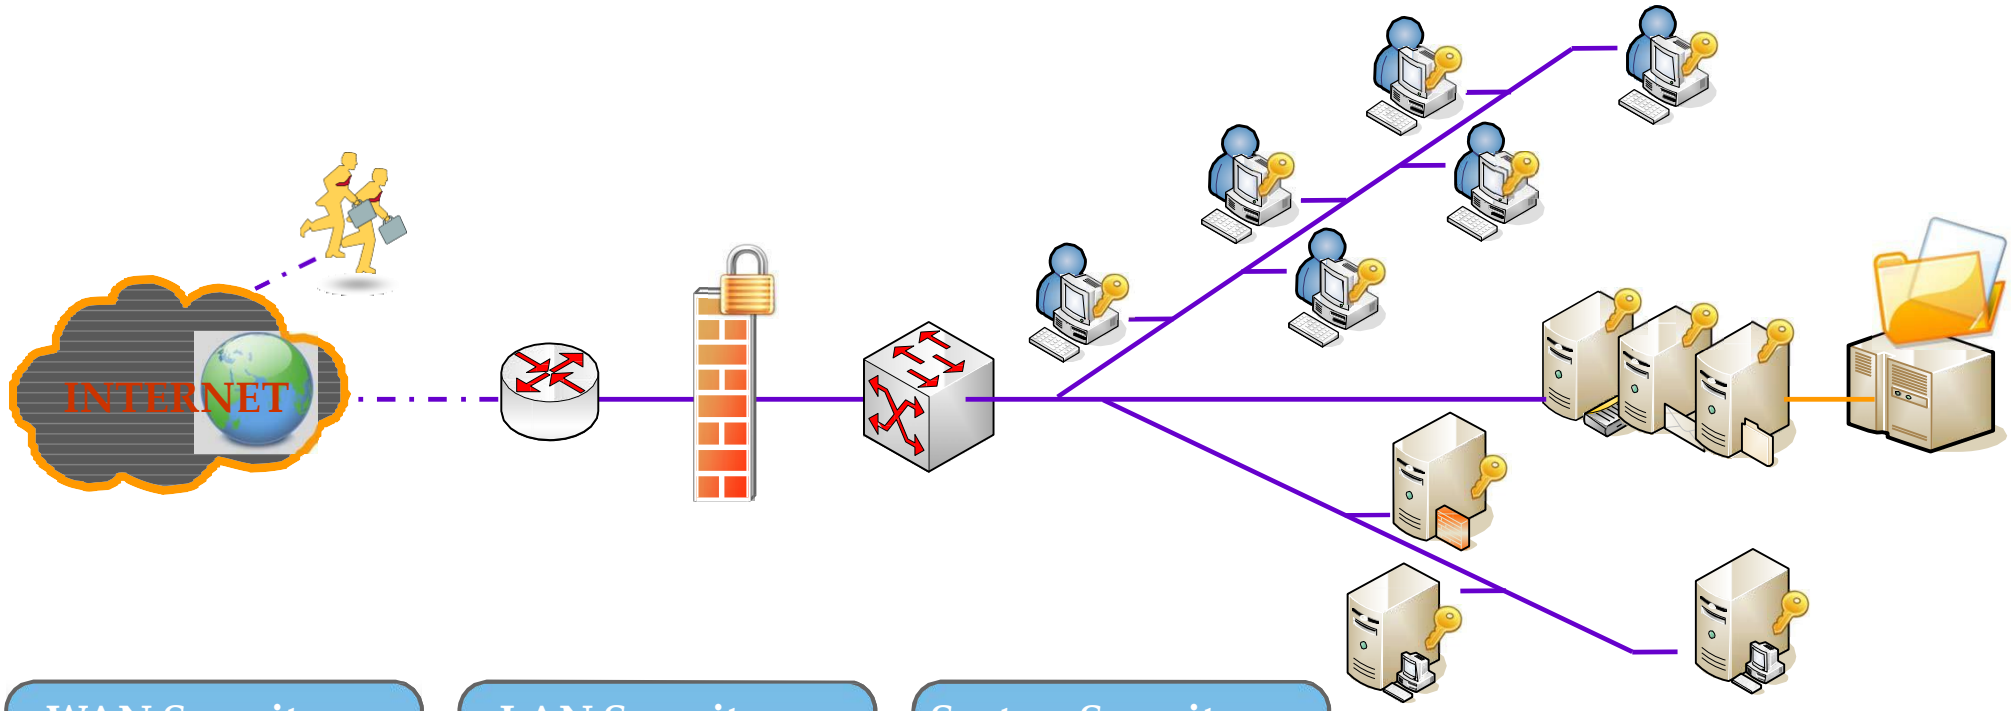


Unified Communication Service



- IP Telephony, Reduce Operation Cost
- Unified Communication, Call/Voice Mail/Audio/Video/Meeting…
- Open, Standard, Extensible Platform, Protect Your Investment

Security Service



WAN Security

- Firewall (Proxy/VPN)
- IDS/IPS/UTM
- Content Filtering

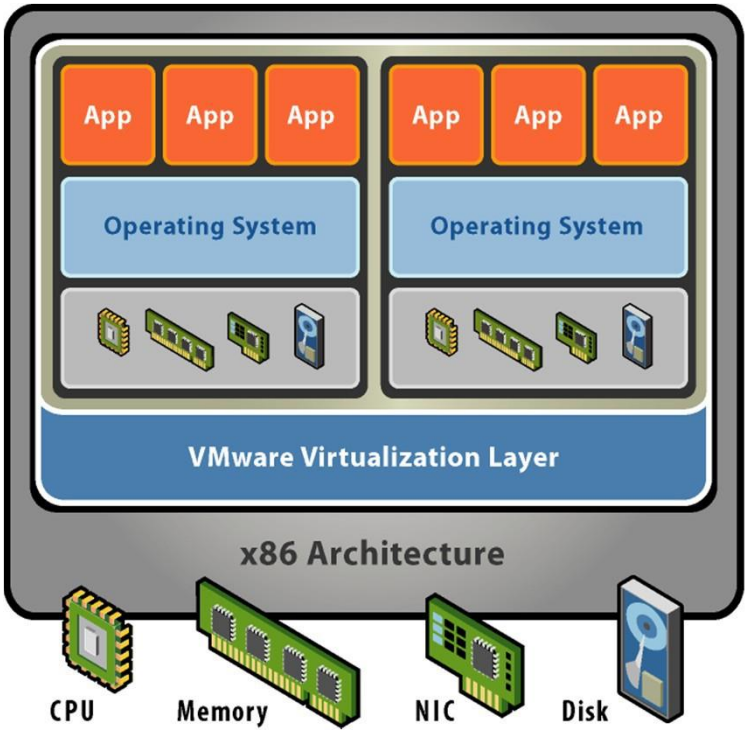
LAN Security

- Client Security Policy Control
- NAC (Network Access Control)
- MARS (Monitor, Analysis & Response System)
- HIPS

System Security

- Device Security
- Document Encryption
- Anti-Virus
- Anti-SPAM
- Anti-Malware

Private Cloud



VMWare Virtualization

- Leverage powerful x86 computer hardware
- Through A proven software technology for capsulation
- “virtualize” the hardware resources into VM
- VM runs its own OS and apps just like a ‘real’ computer
- Multiple VMs share hardware resources without interfering with each other
